DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 8 & 18 recite the limitation "the flux". There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20, 26 & 27 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5,302,520 to Goux (Goux).

Goux teaches a method of enzymatic synthesis of isotopically labeled carbohydrates and sugars. Labeled citric acid cycle (Krebs cycle) intermediates may be rapidly and conveniently synthesized from labeled pyruvate, lactate or alanine. See abstract. The labeling is done with isotopic ^{13}C and is measured via nuclear magnetic resonance. See Example 7. While not expressly disclosed in Goux, the determination of the rate of gluconeogenesis is inherent because the rate of production of the intermediates can be used as an estimate.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 14, 15 & 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over "Use of $^2\text{H}_2\text{O}$ for Estimating Rates of Gluconeogenesis" by Landau et al. (Landau) in view of USP 6,764,817 to Schneider (Schneider).

Landau discloses using deuterium to measure the rate of gluconeogenesis. Landau utilizes mass spectrometry to make the determination.

Schneider teaches the functional equivalency of mass spectrometers, infrared spectrometers and nuclear magnetic resonance spectrometers for the purpose of determining detecting labeled metabolite concentration and flux. Thus, given the art-recongnized functional utility of these measuring means, it would have been obvious to

one having ordinary skill in the art to modify Landau by using NMR in the place of mass spectrometry with the expectation of achieving suitable results.

Allowable Subject Matter

6. Claims 1-7 & 9-13 allowed.
7. Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
8. Claims 16, 17, 19, 21-25 and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
9. The following is a statement of reasons for the indication of allowable subject matter: .

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
